LEARNING SCIENCE 5	THE ORIGEN OF THE UNIVERSE.	Make a presentation about our Solar System: describe the inner planets and give their names, what separates them from the outer planets. Give the name of the gas giants. Make sure you describe and illustrate other celestial bodies we can find in space. How big is our galaxy? How many stars can we find in our galaxy? Give and describe the 3 types of stars. Describe the 3 main shapes of the galaxies. You must illustrate (draw or paste pictures) about everything I am asking for and describe it at the best of your skills.
